How to build a glyph:

1. Pick an onset (beginning) consonant
2. Pick a vowel
3. Draw the consonant + vowel combination in the table above.
4. Pick a coda (ending) consonant
5. Draw the ending consonant by first drawing a line from the spine of the consonant + vowel combination you've just drawn.
6. If you just draw a line to extend the spine, that is the ending consonant *-n*. Finish drawing the consonant by drawing the appropriate detail depending on the ending consonant you chose.

Skip steps 4-6 if you don't have an ending consonant.

Example: How to write «wadsut» (*young man*)

Step 1 Step 2 Step 3 Step 5 (extend spine) Step 6
/w/ /a/ /wa/ /wan/ /wad/

ᠠ ᠠ > ᠠ > ᠠ > ᠠ

/s/ /u/ /su/ /sun/ /sut/

ᠰ ᠰ > ᠰ > ᠰ > ᠰ

/wad.sut/

ᠠᠰᠰ

Example: How to write «lundus» (*to slide, exclamation during drinking*)

Step 1 Step 2 Step 3 Step 5 (extend spine) Step 6
/l/ /u/ /lu/ /lun/ /lun/ (because final -n is a simple line downwards)

ᠠᠲᠤᠮᠤᠨ

[tim.puun]

ᠠᠲᠤᠮᠤᠨ

Exceptions: Diphthongs are represented by marks that don't live at the bottom of the glyph.

How to write syllables with diphthongs:

In Momogunic languages (Dusunic, Murutic, Paitanic) the possible diphthongs are made by applying -i or -u at the end. We use the following marks respectively:

-y / -(V)i	-w / -(V)u
ᠠᠲᠤᠮᠤᠨ	ᠠᠲᠤᠮᠤᠨ

Example: How to write «waig» (*water*)

/w/ /a/ /wa/ /wai/ /wain/ /waig/

ᠠᠲᠤᠮᠤᠨ

Example: How to write «laid» (*old, late, long time*)

/l/ /a/ /la/ /lai/ /lain/ /laid/

ᠠᠲᠤᠮᠤᠨ

Example: How to write «siliu» (*to become, bamboo flooring*):

/s/ /i/ /si/
ᄅ ᄃ > ᄃ

/l/ /i/ /li/ /liu/
ᄃ ᄃ > ᄃ > ᄃᄃ

/si.liu/

Example: How to write «naau» (*light*)

/n/ /a/ /na/ /nau/ /naau/ (add the vowel lengthening mark)
ᄃ ᄃ > ᄃ > ᄃᄃ > ᄃᄃᄃ

Example: How to write «kaau» (*to swim*)

/k/ /a/ /ka/ /kau/ /kaau/ (add the vowel lengthening mark)
ᄃ ᄃ > ᄃ > ᄃᄃ > ᄃᄃᄃ

Example: How to write «au'» (*no, not*)

/a/ /au/
ᄃ > ᄃᄃ

Example: How to write «tai'» (*shit, poop, excrement, to poop*)
